CORE TECHNOLOGIES

Javascript, Vue2/Vuex/Pinia, Typescript, CSS/SCSS, jQuery, React, Node/Express, PostgreSQL, Cypress.

EXPERIENCE

Front-end Developer II / Metopio

OCTOBER 2020 - PRESENT

- Build data visualizations including maps, charts and tables from scratch using Vue.js, Typescript, Highcharts, and Leaflet.
- Create re-usable web applications for data sharing across industries, customizable by branding, features, and data.
- Consume numerous APIs to combine data from different sources to create insights and tell users' story.
- Lead front-end efforts for main projects, including decision-making for Javascript architecture and direction, managing interns and onboarding new employees.
- Play a crucial role in building a small but high-performing team as a first hire of a 20-employee company.

Freelance Developer

AUGUST 2022 - PRESENT

- Create a tool designed to help mentoring programs of all types design their own logic model on a team of two developers.
- Collaborated with clients to understand their needs and delivered high-quality solutions that met their specifications.

Software Engineering Teaching Fellow / Fullstack Academy of Code

MARCH 2020 - SEPTEMBER 2020

- Mentored 20+ students in JavaScript fundamentals, engineering concepts, debugging strategies and writing clean code with weekly office hours.
- Managed 10+ student projects with varying tech stacks, guiding architectural decisions and providing feedback in daily stand-up meetings.
- Lead weekly workshops covering algorithms, data structures and system design, and conducting technical interviews for prospective students.

EDUCATION

Fullstack Academy of Code / Fullstack Immersive

Taras Shevchenko National University of Kyiv / International Law and Legal Studies
